

CELL ON WHEELS

GENERAL PROPERTIES

The unit specially designed for quick deployment of a temporary network during “breakdowns” or to boost up (GSM) networks during big events or disasters.

The unit equipped with a 30 meters height hydraulically extendable mast. The vehicle is available in 4x2 and 4x4 drive.

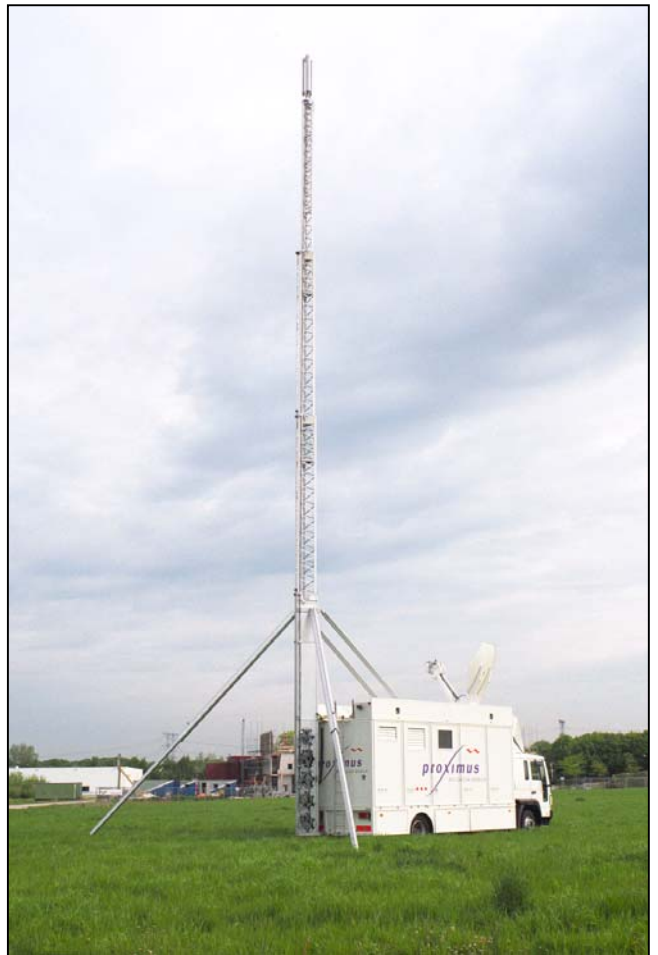

It is fully self supporting and able to operate for long times in the field.

Within 40 minutes the unit will be in operation after arrival on the spot. This can be done by only one person.

Based on a standard concept individual client requirements can be offered upon request.
